

Dear John,

I hope you are doing well. We are writing to you today regarding another update to your website.

Since our previous email to you, we have started to customize your website with CSS. We believe our design choices have greatly improved the creative and visual aspects of your website

Some of our design choices include:

- A colorblind-friendly color palette
- Improved structure for images and text
- Improved user interface

... and more to come.

Additionally, we have created an additional page for your collection of cars.

We hope you are happy with our progress so far.

Kind regards,

Harry Rison, Kaixin Chen, Milan Grubic
